RETAIL PRICE LIST

FALL 1960

SPRING 1961

We invite you to visit WESTERN EVERGREENS and learn about our new type tree and shrub nursery. On our own acreage, we grow completely hardy landscape material for the Rocky Mountain area.

Terms: Cash or check only. We deliver orders of \$50 or more to areas west of Sheridan. We are open 7 days a week during March, April, May and June. The balance of the year we are closed on Mondays and Tuesdays.

Nursery stock in containers is available for year-around planting. It is preferable to plant bare root material in the Spring.

Guarantee: We are able to save you the extra cost of paying for a guarantee because we know our landscape material will grow. We grow it here in Rocky Mountain wind, moisture and soil conditions.

We believe written guarantees of survival of nursery stock are only necessary when there is some question as to the vitality of the stock at the time of purchase.

Seedlings and transplants for hedging in spring only. Order early as we do not have seedlings after April 15th and transplants after May 1st.

EVERGREENS

Spreading Junipers

Pfitzer - Most popular spreader. Deep green color.

1 gal \$1.50 5 gal \$5.00
